## PROJECTS

### The Digital Diary | React JS (01/2023)

- Developed a dynamic blog website using **React JS** for the frontend and **Firebase** for the backend.
- Allowed users to **like, delete, and update** their own posts.
- Used **Sass** for responsive design and **Tilt.js** for 3D animation effects to enhance the user experience on multiple devices and present the content dynamically.
- Deployment link : <https://the-digital-diary.web.app/>
- GitHub link : <https://github.com/Habib7442/the-digital-diary>

### Youtube 2.0 | React JS (01/2023)

- Created a YouTube clone using **React.js** and **Material-UI**.
- Integrated with external **APIs** to retrieve and display data on the front-end.
- Designed a sleek and dynamic user interface with **React.js** and **Material-UI**.
- Deployment link : <https://youtube-habib.netlify.app/>
- GitHub link : <https://github.com/Habib7442/Youtube-2.0>

### Personal Portfolio | React JS (11/2022)

- Created a fully responsive portfolio website using the **React Bootstrap library**.
- Improved front-end functionality with **React JS**.
- Used **Firebase** for seamless back-end support and data storage.
- Deployment link : <https://habibportfolio.netlify.app/>
- GitHub link : <https://github.com/Habib7442/React-Portfolio>

### Netflix Clone | React JS (10/2022)

- Created a replica of Netflix using **React JS, Bootstrap, and Material UI**.
- Designed an engaging and interactive front-end.
- Used **Firebase** for secure user registration and login functionality.
- Deployment link : <https://netflix-clone-224.netlify.app/>
- GitHub link : <https://github.com/Habib7442/Netflix-Clone>
